Rationality is the quality or state of being rational – that is, being based on or agreeable to reason. Rationality implies the conformity of one's beliefs with one's reasons to believe, and of one's actions with one's reasons for action. "Rationality" has different specialized meanings in philosophy, economics, sociology, psychology, evolutionary biology, game theory and political science.

I. If you are American, SSC endorses voting in this presidential election. Andrew Gelman, Nate Silver, and Aaron Edlin calculate the chance that a single vote will determine the election (ie break a tie in a state that breaks an Electoral College tie). It ranges from about one in ten million (if you live in a swing state) to one in a billion (if you live in a very safe state).

Intelligence To be intelligent you first have to know what being Intelligent is. And you also have to know what

being ignorant is. Ignorant is just another word for "Not knowing". But not knowing is not always obvious or clearly understood. That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.

I have long called myself a social conservative. I think it is very important to have standards for behaviour (etiquette) and defined roles. The problems with this system is not that it exists, but the lack of flexibility and the value placed on them.

How a liberal learned to respect conservative thinking

@Daran "No, My Part 1 was a response to the first question only in your Part 1. My Part 2 was a response to the second question in your Part 1. I had intended to work through them all, one after the other in order, as many as time would permit.
