Agriculture and the environment. The arrival of humans in an area, to live or to conduct agriculture, necessarily has environmental impacts. These range from simple crowding out of wild plants in favor of more desirable cultivars to larger scale impacts such as reducing biodiversity by reducing food availability of native species, which can propagate across food chains.

Environmental impact of pesticides - Wikipedia

3 representation of the experts, and he expressed his confidence in the scientific expertise of the participants of the meeting to carry out the important task they had

Meeting on Guidance for standard setting ICP EHH 018 VD96

The major pesticides of the world are glyphosate-based herbicides (GBH), and their toxicity is highly debated. To understand their mode of action, the comparative herbicidal and toxicological effects of glyphosate (G) alone and 14 of its formulations were studied in this work, as a model for pesticides.

Toxicity of formulants and heavy metals in glyphosate

An ion ($\text{E}^{\pm n}$) is an atom or molecule that has a non-zero net electrical charge. Since the charge of the electron (considered "negative" by convention) is equal and opposite to that of the proton (considered "positive" by convention), the net charge of an ion is non-zero due to its total number of electrons being unequal to its total number of protons.

Ion - Wikipedia
