American Chemical Society - ACS Publications Home Page

Environmental engineering is the branch of engineering concerned with the application of scientific and engineering principles for protection of human populations from the effects of adverse environmental factors; protection of environments, both local and global, from potentially deleterious effects of natural and human activities; and improvement of environmental quality.

Environmental engineering - Wikipedia

Bioprocess Science Minor. Coordinator: Dr. Gary Scott . The bioprocess science minor gives students an understanding of the rapidly developing bioprocessing industry, which uses the chemical, physical and biological processes developed by living organisms or their cellular components in a type of advanced manufacturing of specialty commercial products.

Compress layers of sediments in an easy-to-build deformation chamber to see folds, faults, and other geologic features develop in real time.

Squeeze Box: Earth & Environmental Science Activity

Climate change is now a major concern. The polar ice caps are reported to be melting and sea levels are rising due to an increase in the average temperature of the Earth[®]'s atmosphere and oceans. Global warming is driven by increasing levels of tropospheric gases that contribute to the so-called greenhouse effect.
